### Learning English – our future!

Long in the past were the times when studying a foreign language was not welcome and moreover, there wasn't much application of it.

As luck would have it, the situation has changed greatly thanks to the expansion of all types of ties of this country with other countries in the world. A person who has a good command of a foreign language feels at ease not only in his native country but abroad, too, if he finds himself there. Here is a familiar quotation: «Language is the dress of thought», and the knowledge of two or more languages will help us to «dress».

From my point of view, nowadays English is an essential part of our daily life. A truly learned person should know English, which will enable him to read English books in original, to communicate with foreigners, to participate in cultural and educational exchanges with other coun-

tries. Many joint ventures have been and are being set up late, and the knowledge of a foreign language will provide you with a chance of dealing with it.

I must say, English is worth studying.

I guess to achieve real success in life is im-

possible without knowing a foreign language, especially English. If you are a scientist you need it to read special literature and to take part in conferences. If you are a student, you have a chance to

continue your studies abroad if you know English. If you want to be a good specialist in any field you need English to receive new information on your speciality.

That's why I am very glad that I know English a little and I am going to learn it better in future.

### *Why it is important to study English*

And how it can help us in the future?

There are hundreds of languages in the world, but one of the most popular is English. English is recognized as an official international language.

And that is the main reason

*Багато мов у світі*

why it is important to study English. But in my opinion there are another significant things, which have to persuade us to study English:

We all like to travel, so English as the most common foreign language will help us to solve any problem and to find any place in the other country.

Nowadays we have an opportunity to continue the education in the colleges or universities of the other countries.

English will help us to pass the exams and study successfully.

English is an international language of business. If we want to get an interesting

job with good salary in the future, we must speak foreign language perfectly.

In addition, English is the language of the science and brand new technologies. English will help us to find the information and the best examples of the world experience from English-language sources.

English is the language of Film industry and Show business. If you want to watch movie in original version and understand

foreign songs, you have to know English perfectly. Besides it, English is the language of Shakespeare, Byron, and Arthur Conan Doyle. An excellent level of English will help

us to read the classics in the original. And if ever we get to London, with advanced English we can better understand this

wonderful city and splendid country.

Hope that above mentioned examples demonstrate and emphasize the importance of learning English.

### English is a ticket to successful life

Today's world is pretty challenging in different aspects: from psychological to intellectual. Knowing a foreign language besides your native has become a necessity in a modern society. Multilingualism is an aim of many modern people. However, why is it so important today to learn a foreign language?

In my view, being fluent even in more than one language opens up to a person many business opportunities. It's a known fact that usually companies are looking for people with foreign language skills. Let's imagine there are two candidates for a post of an assistant of a company's president. Whom they would choose: the one, who speaks his native language and English a little bit or somebody, whose resume says about knowing English, Ukrainian and French. Obviously, the second one has more chances so far. Furthermore, having multilingual employer in a company gives opportunities for international cooperation.

On the other hand, apart from career benefits learning a foreign language

is a real treasure for travellers or communicative people. It helps to explore new countries, places, find out about lifestyle through talking to local people. For example, you won't need to find equivalent in your native language to translate a proverb you heard in a conversation with locals. You can feel free in making friends from different parts of the world. And the opportunities can change your life or offer you amazing experience.

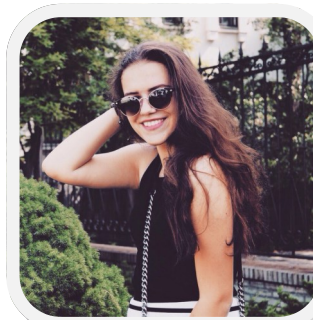

In addition to this, you should learn a foreign language for development of your brains. A learning process involves a lot of mental work. It particularly touches your memory abilities. That's why learning a language is really useful for your intelligence.

Overall, no matter for what reason you're learning a foreign language, I guarantee you that this decision doesn't have any downsides. It will only lead you to success, because the more languages you know, the better you can express yourself. So, keep your head up and improve your knowledge!

### Language - the way to the buture

Language - a reflection of the essence of each country and culture. In my opinion, no country or culture can not be known in full without any idea of their language. For example, Chinese.

Flexible and melodic language, as well as its natives. By the way, did you know that in China is completely normal to go and sing even in a crowded place? Toning Through language helps Chinese very melodic and a lot of them sing perfectly.

Of course, in the modern world with constantly developing international relations it is very necessary to know few

languages. In short, the languages required for the job. At least you need to know English, and if you know more, it welcomes. Now the most demanded are Chinese, Spanish, German, etc.

### Вивчення мови тренує пам'ять

Scientists have proved that learning languages trains memory and develops brain very well. Switching between different languages is an excellent exercise for the brain. And bilingualism increases efficiency of the brain.

All in all, languages are the indicator of human erudition. And any language is always useful in life.

### English is the main language in the world

I think, nowadays it is very important to know foreign languages. Some people learn languages, because they need them for their work, others travel abroad, for the third it's just a hobby. People want to know languages, to write to their pen-friends or to communicate with people from different countries, to meet more people and make new friends. Also, they want to read books of famous writers in original, to read newspapers and magazines. It helps them to know more about different events, people's life, customs and traditions.

Learning foreign languages broadens our minds, people become educated. In my opinion, languages are especially important for those who works in different fields of science and technology,

in politics. Foreign language helps to know the native language better. People, who know a lot of languages are called polyglots. We know the names of some of them: German professor Shlimman, famous writer Shakespeare, philosopher Socrates and many others.

Nowadays, English has become an international language. Over 300 million people

Personally, I think that to know foreign languages today is absolutely necessary for every educated man, for every good specialist. So let's learn foreign languages and discover with them many interesting things in our life!

### *Learning English is the way forward*

Every day distances between different countries seem less. For this reason it's becoming more and more important to know different languages, especially English. Nowadays our life is closely linked with it. Social networks and business partnership, different banners and posters, banks and trade, even our leisure, we spend watching movies and reading books. All these things are usually in English.

#### *Why is learning English important for every educated person?*

Most people who have university education are employed in the spheres related to either computers or communicating with foreigners. To solve a problem you need to know how to do it. To google is the easiest way to find the best possible solution. It means to search for something on the Internet using the Google™ search engine. Without knowing any foreign language your area of search will be limited to the information in your mother tongue.

#### *What role does English play in different spheres of life?*

Apart from our mother tongue we need to have a common language which makes us able to communicate with other part of the world. English is the common language which is known to most of the people in the

world. It is very important to have good English because

an effective communication can reach people better.

Do you have to use English in your everyday life?

Now I am a pupil and I don't have to use English in my everyday life. I read books in English, watch films in English, but I do it because I like it. I hope that I

will become an important and will

be using English everyday.

So, I conclude by stating that apart from your mother tongue you need to have a common language to communicate with others and share ideas with them. English plays a role of common language in all countries. English is the official language for many countries and it plays a prominent role in all sector of work and it is highly useful for business field and private sector.

### *Benefits of English in today's society*

This is a big plus for those who like to travel or to study abroad. Knowing the language can easily travel most European countries, to say nothing of the more remote corners of the world, such as Canada and the USA. And education abroad is a ticket to a better life, which can result in high-paying job and financial independence.

Communication and sharing experiences with other people through the Internet. The network can find a wealth of information in English, often the data is more fresh and informative.

Additional undermining - in our country, more and more people want to learn the language, so students can work in their free time tutors, do tutoring or go further and work in English copywriter agencies. This is very promising and with the wealth of knowledge your career is guaranteed.

And Finally remember the fun - watch movies and read books in the original much more interesting. Often interpreters destroy the hidden meaning of a work of art, and the reason is that there are some realities that can not be translated, so they just dropped. ### Сьогоднішня вимагає обізнаності

Іноземні мови відіграють у житті кожної людини важливу роль. Загалом людина, яка володіє мовами, – різнобічно розвинута особистість, володіє кращими здібностями та більш упевнена в спілкуванні з людьми.

Для успішної роботи в найрізноманітніших сферах і напрямках однієї рідної мови явно буде недостатньо, необхідне знання ще й іноземної. Чим більше мов на сьогодні ти знаєш, тим краще.

На першому місці за популярністю, звичайно, непорушно стоїть англійська мова. У багатьох випадках саме вона використовується при заповненні анкет, складанні резюме, у діловому та приватному листуванні.

Володіння англійською мовою у сьогоднішні - уже не дивовижна річ, а необхідність. Нині її вивчають у дитячих садках, школах, коледжах, не кажучи вже про численні курси та тренінги. А в деяких країнах навіть інші предмети шкільної програми викладають англійською мовою.

Знання німецької мови також не менш важливе. Зараз ця мова цінується як ніколи. У багатьох школах і університетах вона навіть ставиться понад англійську. Очевидно також, що стрімко набирає обертів актуальність японської та китайської мов. Багато фірм шукають

фахівців, які добре володіють цими мовами. А знайти їх далеко не просто.

Поряд зі зростанням ролі іноземних мов збільшується й кількість бажаючих оволодіти професією пе-

рекладача. Але вивчення іноземної мо-

ви – справа не легка, тут потрібен серйозний стимул. Знан-

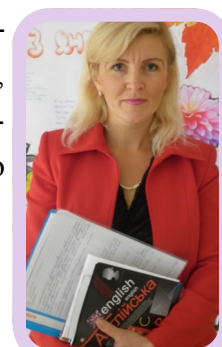

ня іноземних мов дають більше шансів для отримання високооплачуваної престижної роботи. Користь від володіння ними є й у повсякденному житті, а саме: можливість спілкуватися з іноземцями, можливість розуміти зміст іноземних пісень, перегляд та читання книг у оригіналі, можливість додаткового заробітку.

У наш час буде зростати потреба у фахівцях, які володіють іноземними мовами. Отже, іноземні мови відіграють важливу роль у всіх сферах нашого життя.
